BUILDING SIZE

60,000 sq ft

Further evidence of the attraction of Castlewood to high end engineering companies occurred with the deal concluded with Meridian Lightweight Technologies.

The world's leading supplier of innovative lightweight cast metal solutions for the transport industry, Meridian were again located in the close proximity to Castlewood in outdated stock.

Having outgrown their existing facility the search for top quality accommodation to match the standard of product produced quickly drove them to Castlewood, particularly as it enables them to retain their valuable workforce but also take on a building in keeping with the high engineering work they undertake for a range of household name clients.

Geoff Storr of Meridian Lightweight Technologies commented:

“The new facility allowed us to expand the machining of large structural components and support out magnesium casting operation.”

By securing a new build unit of just over 60,000 sq ft Meridian ensured they were occupying top caliber premises commensurate with their high quality products as they became valued manufacturing occupiers at Castlewood Business Park.
